

MASSACHUSETTS

Medex[®]

Medex[®] 3 Plan 2015—Summary of Benefits with 3-Tier Prescription Drug Coverage: \$10/\$20/\$35

This Medex plan provides benefits for the:

- Medicare Part A Deductible and Coinsurances
- Medicare Part B Deductible and Coinsurance
- Prescription Drugs
- OBRA Benefits

Town of Plymouth

This health plan, alone, does not meet Minimum Creditable Coverage standards and will not satisfy the individual mandate that you have health insurance; however, the Commonwealth of Massachusetts has stated that enrollment in Original Medicare (Medicare Part A and Medicare Part B) satisfies these standards.

Limitations and Exclusions. These pages summarize the benefits of your health care plan. Your plan description and riders define the full terms and conditions. Should any questions arise concerning benefits, the plan description and riders will govern. For a complete list of limitations and exclusions, refer to your plan description and riders. **Please Note:** Blue Cross and Blue Shield of Massachusetts, Inc. is the administrator of the benefits described in this Summary of Benefits. Blue Cross Blue Shield administers claim payments only and does not assume financial risk for claims.

Important Information About Your Prescription Pharmacy Program

Why Do I Pay Different Amounts for Different Medications?

Medications are placed on different tiers based on a variety of factors, including what they are used for, their cost, and whether an equivalent or alternative medication is available. The level or tier that your medication is on determines your cost share.

What Is Cost Share?

When you fill a prescription, the amount you pay to the pharmacy is called your cost share. Your cost share may include your copayment, coinsurance, and deductibles. Generally, you pay the lowest amount of cost share for a Tier 1 medication and the highest amount for a Tier 3 medication. The pharmacy will inform you of your cost share for each prescription.

For more information about your specific prescription benefits, please review the information in the chart on the previous page or call the Member Service number on the front of your ID card, Monday through Friday, 8:00 a.m. to 6:00 p.m.

What Is Quality Care Dosing?

Quality Care Dosing is a pharmacy management program whose goal is medication safety and affordability. The Quality Care Dosing program helps to ensure that the quantity and dose of medications you receive complies with U.S. Food and Drug Administration (FDA) recommendations, as well as manufacturer and clinical information.

As part of this program, when you fill a prescription, the dosage is verified electronically in two ways:

- **Dose Consolidation**—Checks to see whether you're taking two or more pills a day, and whether that dosage can be replaced with one pill providing the same daily dosage.
- **Recommended Monthly Dosing Level**—Checks to see that your monthly dosage is consistent with the manufacturer's and FDA's monthly dosing recommendations and clinical information.

For the most up-to-date list of medications in the Quality Care Dosing program along with associated dosing limits, please visit our website at www.bluecrossma.com/pharmacy and click on Pharmacy Management Program, then select Quality Care Dosing.

Why Do Some Medications Require Prior Authorization?

Prior Authorization is another pharmacy management program that has a goal of ensuring safety and affordability. As part of this program, your doctor is required to obtain prior authorization before prescribing specific medications. This process ensures that your doctor has determined that this medication is necessary to treat you, based on specific medical standards.

For the most up-to-date list of medications that require prior authorization, please visit our website at www.bluecrossma.com/pharmacy and click on Pharmacy Management Program, then select Prior Authorization.

What Is Step Therapy?

Step therapy is a pharmacy management program that also has a goal of safety and affordability for members. Step therapy is a key part of our prior authorization program that allows us to help your doctor provide you with an appropriate and affordable medication treatment. Before coverage is allowed for certain costly "second-step" medications, we require that you first try an effective, but less expensive "first-step" medication. Some medications may have multiple steps, and sometimes it's best to start with the first step. For the most up-to-date list of medications that require step therapy, please visit our website at www.bluecrossma.com/pharmacy and click on Pharmacy Management Program, then select Step Therapy.

Why Aren't All Medications Covered?

Your prescription pharmacy program provides coverage for over 4,000 prescription medications. Most medications that are not covered and are on our non-covered list have equally safe, effective, and covered alternatives for treating the same medical conditions. Check with your doctor about appropriate alternatives if you currently take any non-covered medications.

For the most up-to-date list of medications that are not covered along with their covered alternatives, please visit our website at www.bluecrossma.com/pharmacy and click on Medication Look Up, then select Medications that are not Covered.

Please note: Your doctor can request coverage for a non-covered medication if no covered alternative is appropriate for treating your condition. In such cases, please ask your doctor to contact Blue Cross Blue Shield of Massachusetts.

What Are the Benefits of Using the Mail Service Pharmacy?

If you take a medication on an ongoing basis, such as one to lower cholesterol or treat high blood pressure, you'll find that our mail service pharmacy:

- Is a fast, convenient way to get your medications
- Can save you money
- Gives you a 90-day supply of your medication for less than you'd pay at a retail pharmacy
- Sends the prescription to your home

Express Scripts[®] administers our mail service pharmacy. If you're already using another mail service pharmacy, your remaining refills will be transferred automatically to the Express Scripts pharmacy.

Note: Your prescription pharmacy program limits your prescriptions to a 30-day supply from a designated retail pharmacy for each prescription, unless you are using Express Scripts for a 90-day supply of an approved ongoing medication.
