## Free Graffiti Removal Program for Private Property Owners

The Plymouth Office of Community Development is currently administering a FREE Graffiti Removal Program to assist residents and businesses in removing graffiti as quickly as possible from their property in order to discourage the appearance of further acts of vandalism.

The Town of Plymouth understands that property owners are victims of vandalism when graffiti lands on their property. Acknowledging this, a graffiti removal program will be offered town-wide at no cost to private property owners to assist them in complying with the new Graffiti Bylaw. In order to participate in this program, property owners must complete and sign a consent to enter and release of liability form that gives the Office of Community Development permission to remove graffiti from their property. Once it is completed, it is submitted to the Office of Community Development where it will remain on file.

### How Does The Program Work?

Just call the Office of Community Development, leave your name, address, daytime phone number, and the exact location of graffiti on your property. After we have your signed consent to remove graffiti from the property, a third party contractor will remove the graffiti within two days of request.

### What Properties Are Eligible For The Program?

Properties eligible for "continuous" removal services are limited to private commercial and residential properties.

### Will All Graffiti Be Removed From My Property?

Graffiti will be removed only from portions of the property visible from a street. In alleyways, graffiti will be removed only within 50 feet of the alley entrance as measured from the street curb.

We do not remove graffiti from: construction sites, vehicles, dumpsters & containers, surfaces above two levels, private property not clearly visible by public right of way and locations with no access signs present.

### When Should You Report Graffiti?

As soon as you see it! 1-508-747-1620 ext 149

### How Do I Report Graffiti On Other Property?

Just call the Plymouth Office of Community Development. Report the exact address location of the graffiti, your name, address, and daytime telephone number. OCD staff will then contact the property owner to obtain consent to have the graffiti removed.

**This Program is funded by the Plymouth Growth & Development Corporation**
