2.0 POLICY GUIDELINES

In recognition of the need to make more efficient use of our natural resources, create markets for the materials collected in recycling programs, reduce solid waste volume and disposal costs, and serve as a model for private and public institutions, the Town of Plymouth supports purchasing recycled products whenever such products meet quality requirements and are available at reasonable prices and terms.

The decision not to procure recycled products shall be based solely on a determination that a satisfactory level of competition does not exist, that items are not available within a reasonable time period, or that items fail to meet reasonable performance standards, or are only available at an unreasonable prices.
