

TOWN OF PLYMOUTH DEPARTMENT OF PUBLIC WORKS PROJECT SPOTLIGHT

MAY 2023

WATERFRONT PICNIC TABLE AND BENCH REVITALIZATION

Project Location

Located behind the Water Street Sewer Pump Station are a series of new picnic tables and benches constructed by the Department of Public Works (DPW) Facilities Maintenance Division in the spring of 2023. The preexisting metal benches and picnic tables were corroded and presented a safety hazard to the public. The DPW Parks Division assisted in the effort by removing the worn and corroded furniture. The Town's talented craftsmen utilized the existing concrete pads and posts and constructed five new wheelchair accessible picnic tables and six benches along the pedestrian path abutting Plymouth Harbor. Visitors to the waterfront are encouraged to take time to enjoy the handiwork of Plymouth's DPW staff while sitting back and enjoying the view.
