TOWN OF PLYMOUTH ANNOUNCES NO WATER SERVICE DISRUPTION PLANNED FOR TUESDAY JANUARY 20

FOR IMMEDIATE RELEASE: 1/17/2026

Plymouth, MA — The Plymouth Department of Public Works (DPW) Water Division announces that there will be **no water service shutdown on Tuesday, January 20, as previously communicated to some local businesses.**

The Water Division, in coordination with its contractors, has successfully engineered an alternative solution for the gate valve installation scheduled to take place at the entrance to Town Wharf next Tuesday. This revised engineering approach allows the necessary work to proceed without requiring the water main to be shut down.

Businesses that received a notification on Friday indicating that water service would be temporarily shut off on Tuesday, January 20, between 8:00 am and 2:00 pm, are advised to disregard that notice. There will be no planned disruption of water service on this day.

The Town appreciates the community's patience and cooperation as this important infrastructure work moves forward. We regret any confusion this may have caused and thank our residents and business community for their understanding.

For additional information, please contact the Plymouth Department of Public Works Water Division at (508) 322-3406.
